PROJECTS

- **BREAST CANCER DETECTION**   **Link2025**

An Exploratory Data Analysis (EDA) project focused on early breast cancer detection. It analyzes FNA data of cell nuclei using statistical techniques, heatmaps, and visualizations. The goal is to identify patterns between benign and malignant cases and prepare the data for future machine learning models.

- **RESTRUANT TOPOLGY DESIGN**   **Link2025**

A smart network architecture designed for restaurants to improve communication between kitchen, billing, and guest zones. Built using a hybrid star topology to ensure fast data flow, minimal delays, and better scalability. Ideal for both small and multi-branch setups with IoT-based monitoring features.

- **CASH AND CARRY MANAGEMENT SYSTEM**   **Link 2025**

CASH AND CARRY MANAGEMENT SYSTEM with all run quries on workbench 8.0. And all remaining details in given link of my Git-hub.

- **EDA-ML- FEATURE ENGINEERING**   **Link 2025**

This repository is a collection of useful code and notebooks that will help you learn and grow in the field of data science and machine learning. It's packed with practical examples, mini-projects, and real-world applications to help you master the key concepts.

- **Java MVC Student Database Application**   **LInk2025**

This is a simple Java application (not Maven-based) that demonstrates a custom MVC framework and connects to a MySQL database.

See details in the mentioned link.
